NAAC Accredited 'A++' Grade (CGPA 3.52 out of 4.00)

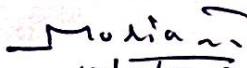

## **LETTER OF RECOMMENDATION**

It gives me pleasure to write this letter of recommendation for Ms. Diya Pujara, who has been my student at the Department of Civil Engineering, Pandit Deendayal Energy University, Gandhinagar (India). I have known Diya Pujara since her first year, I got the opportunity to have her as my student. She has always been an active and responsive student in the class. She has excelled academically, maintaining a strong grade point throughout her studies, achieving a 9.82 SGPA with an outstanding grade.

During her academic journey she has completed rigorous one year foundation course at Centre for Environmental Planning and Technology University (CEPT University). This accomplishment showcases her dedication towards acquiring strong knowledge about design and engineering, as well as her ability to adapt challenging academic atmosphere. These qualities of her made her eligible to intern at Arizona State University in summer 2024. She dedicatedly worked on Clay 3D Printing Technology and successfully operated the printer to create functional 3D models, becoming the first intern in the lab to achieve this milestone.

She has good command over some of the important software tools. At the same time, her communication and oratory skills are praise-worthy. I have known her as a student who is bright in academics and equally active in extra and co-curricular activities. Diya demonstrated exceptional creativity and technical skills by designing and constructing an innovative model as part of her coursework. Her ability to integrate theoretical knowledge with practical implementation showcases her strong foundation in civil engineering and problem-solving abilities. She has a friendly attitude towards her colleagues, juniors and seniors and has good networking skills.

In the time that I have known Diya, she has shown the potential to excel in any field that she opts for in her career and it is due to these qualities and abilities that she will truly be an asset for your establishment. I thus offer high recommendations for Diya Pujara for this internship opportunity. If you have any questions regarding this recommendation, please do not hesitate to contact me.
